

Why fund intermediaries?

Grassroots movements are creating systemic change on the major social, economic, and ecological crises globally, yet they are chronically under-resourced.

1%

Only **1 percent** of philanthropic funding from U.S. foundations goes to organizations addressing climate change, a fraction of which is received by grassroots groups¹

Initiatives led by Indigenous Peoples receive only **0.03%** of funding in the U.S.²

.03%

Women's environmental initiatives receive less than **0.02%** of funding.³

.02%

Why is it hard for large funders to reach grassroots work?

Geographic distance from grassroots groups

Lack of capacity to administer many, often smaller, grants

Reporting requirements that are overly burdensome

Funding policies that limit grants to formally registered organizations

Lack of relationships with grassroots organizations

Why are intermediaries critical for resourcing climate action?

Aggregation. Intermediaries aggregate and communicate insights, priorities, and needs from the grassroots to larger funders, when appropriate.⁴

Capacity. Intermediaries take on reporting burdens, reduce overhead, and help larger funders resource solutions at the intersection of environmental, racial, economic, and social justice.⁵

Efficiency. Intermediaries can disburse 'big bet' grants from philanthropies quickly to under-resourced groups⁶ and geographies.⁷

Experimentation. Intermediaries can take on the risk of bold investments, allow funders to experiment with new funding niches⁸, and share learnings with the philanthropic community.

Expertise. Intermediaries offer deep experience in working with and accompanying grassroots movements.

Partnership. Because intermediaries are working directly with grassroots groups, they are well-positioned to connect groups to each other; adapt to local changes in political and social contexts; and facilitate local, regional, national, and international coalition-building and collaboration, when appropriate.⁹

Philanthropic System Change. Intermediaries can advocate for and shift funder practices to center grassroots needs and interests across the field to shift billions towards high-impact climate solutions. Intermediaries facilitate grassroots engagement in participatory grant-making processes.
